

IFCO Plastic Pallet: Meet Dora

The new industry standard

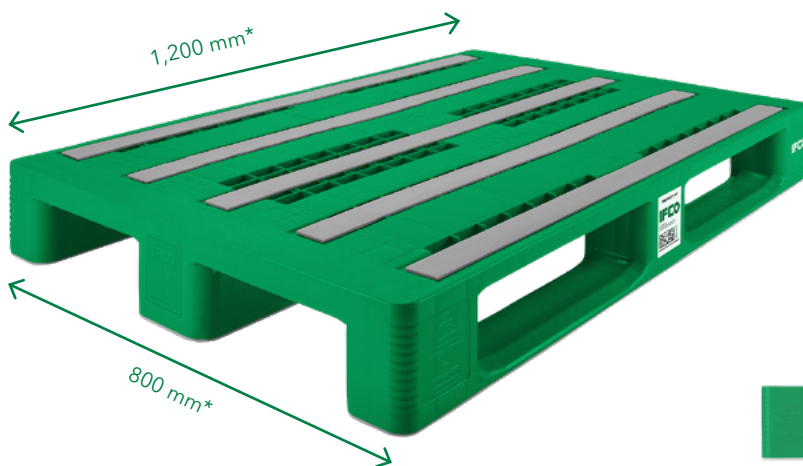

IFCO

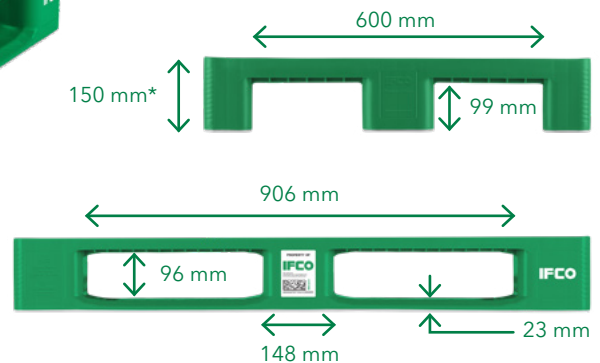

Get to know Dora, the **new industry standard**

Meet Dora, your ideal solution for a sustainable and efficient supply chain. Dora is a reusable, robust plastic Euro pallet, measuring 1,200 x 800 x 150 mm. Equipped with anti-slip skids and an anti-slip top deck, Dora serves as the perfect carrier for IFCO reusable containers and various boxes. It is meticulously designed to optimize the entire supply chain, ensuring seamless loading and delivering excellence all the way to the shelves at the point of sale.

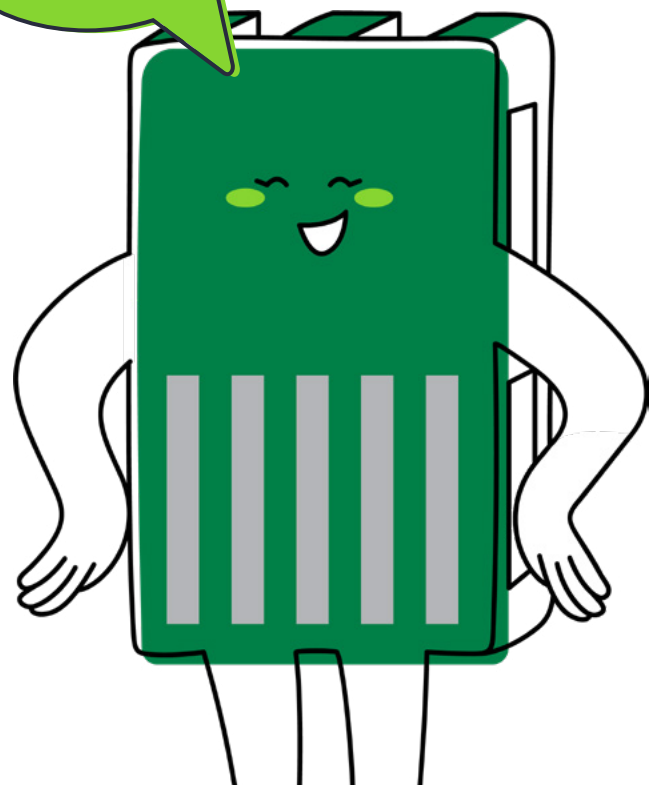

* The dimensional tolerance is +/- 6 mm for the length and width and +/- 2 mm for the height

Key features

-  **Consistent standard Euro pallet dimensions**
-  **Suitable for both manual and fully automated processes**
-  **Anti-slip material beneath the skids and on the top deck**
-  **Stable and sturdy, designed to withstand heavy loads (dynamic load capacity: 1,250 kg)***
-  **Suitable for high-bay warehouses**
-  **Suitable for hygiene applications**

I'm in perfect shape

* ISO 8611 evaluated at the VDZ Testing Facility in Germany

Why choose the IFCO Plastic Pallet Dora

When it comes to reusable pallets, there can only be one winner. Across every category, IFCO’s Dora emerges as the undisputed champion, offering a wealth of advantages that encompass efficiency, sustainability, and durability even in frozen environments. In achieving this, the plastic pallet not only secures its place at the forefront but also sets an innovative new standard for the industry.

Advantages of IFCO’s Dora over wooden pallets

Dimensionally-stable

Consistent dimensions, moisture resistant, ensuring compatibility with automated systems

Digitally-enabled

Track & Trace, automated declarations, and inventory management facilitate transparent supply chain

Hazard-free

Splinter-free, nail-free, mould-free, and defect-free, providing a safer working environment

Sustainable

100% reusable and recyclable, up to 10x more trips than wood, reducing waste and natural resources, and transport-related carbon emissions

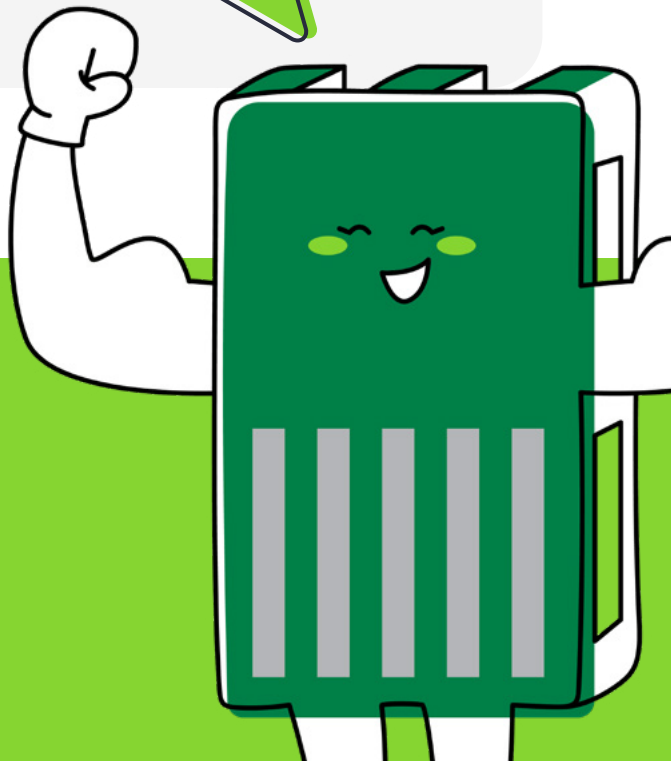

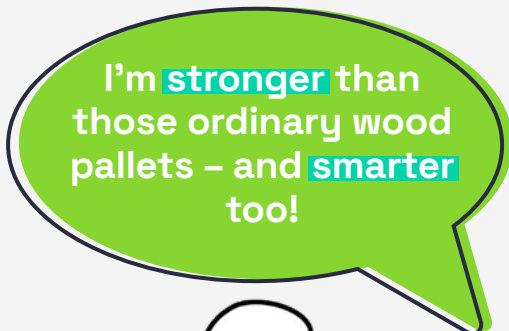

Light weight

Over 25% lighter than wooden pallets, reducing transportation costs and improving handling efficiency

Long-lasting

Durable and robust with long lifespan and less than 1% damages, ensuring uninterrupted operations

Fast facts: IFCO Dora vs. wooden pallet

	Pallet weight	Damage rate
IFCO Pallet	18 kg	<1%
Wooden Pallet	22-25 kg	>25%

IFCO's Plastic Pallet Dora: key strengths and advantages

Ideal for transporting fresh produce

- No nails, sharp edges, or splinters; eliminating the risk of loose components
- Resistant to water, heat, and cold
- ISO 8611 evaluated at the VDZ Testing Facility in Germany
- Pooled by IFCO, offering the flexibility of the service centre network

Industry-leading hygiene standards

- Made from high-quality HDPE food-grade, contamination-free plastic (DIN 10503 and EHEDG)
- Washable at temperatures of up to +90°C or with a steam cleaner
- No build-up of mould or rust; zero water absorption
- Not bound by ISPM-15 hygiene standards

Safe handling

- Stable dimensions suitable for automated warehouse operations and use on warehouse shelves
- Easy all-round access
- Rounded corners to reduce the risk of forklift truck damage
- Film-edge designed for securely attaching the film to the pallet

Supports sustainable supply chains

- Reusable over 120 times
- 100% recyclable
- Long product lifecycle
- Lightweight to maximize transport efficiencies and reduce carbon emissions

Dimensions	Dimensions (L x W x H)*	1,200 x 800 x 150 mm
Logistics	Pallet deck	Separated, with anti-slip strips
	Weight	18 kg / tolerance ± 0.5 kg
	Static loading capacity	7,500 kg
	Dynamic loading capacity	1,250 kg
	Warehouse rack loading capacity	1,250 kg
	Quantity per HGV delivery (33 stacks, 15 layers)	8,910 kg / 495 pallets
Material	Material	HDPE, Palgrip® (anti-slip surface), metal profiles
	Color	Signal Green (RAL 6032), Basalt Grey (RAL 7012)
Properties	UV-resistant, anti-slip skids, welded, 3 stiffening profiles	
Temperature range	Can be used in temperatures from -30°C to +45°C, wash at up to 90°C	

* The dimensional tolerance is +/- 6 mm for the length and width and +/- 2 mm for the height

Our commitment to **sustainable excellence**: elevating logistics responsibly

At IFCO, sustainability is woven into the very fabric of our operations. The advantages are clear, providing not only cost benefits but also paving a sustainable path forward – fulfilling our duty to nurture a healthy planet and secure resources for future generations.

Sustainable benefits of the IFCO Dora Plastic Pallet

Reduce your environmental impact

Do more trips with one pallet

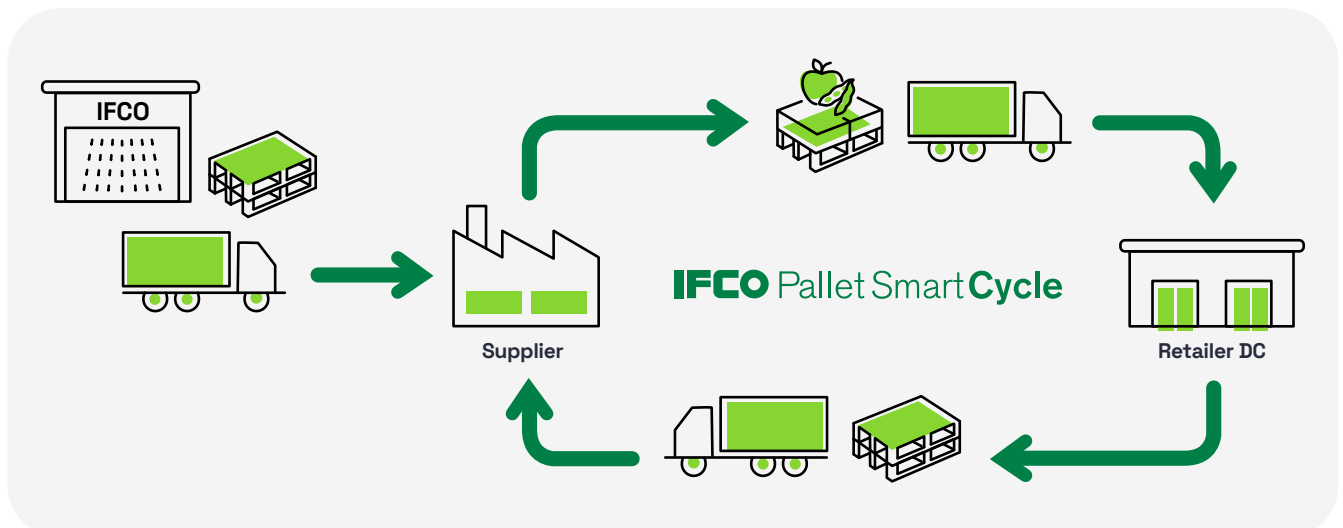

Optimize logistics with a lighter pallet

Our durable plastic pallets embody the perfect synergy of lightweight design and longevity, reducing natural resource consumption and waste generation. Dora's exceptional durability eliminates the need for transport legs related to the repair or disposal of wooden pallets, further minimizing resource consumption and waste. They champion a logistics pooling model that is not only more efficient but also more sustainable. By choosing our pallets, our customers can reap the benefits of these environmental savings, distinguishing our service from poolers of wooden pallets.

Iñigo Canalejo, Vice President of ESG

Embracing the perfection of circularity

IFCO's durable plastic pallet makes our SmartCycle even smarter, cutting transport legs and reducing the carbon footprint.

How IFCO's pooling works to your **advantage**

Discover the advantages of IFCO's pooling system, creating a sustainable supply chain for reusable plastic pallets. Our meticulous tracking and monitoring ensure that each pallet adheres to our rigorous standards of quality and hygiene throughout its extended life cycle. The benefits are clear:

Simple, cost-efficient, and transparent operations

Switch from CAPEX to OPEX for financial flexibility

Minimized downtime for trucks and warehouse staff

No hidden costs or fixed fees

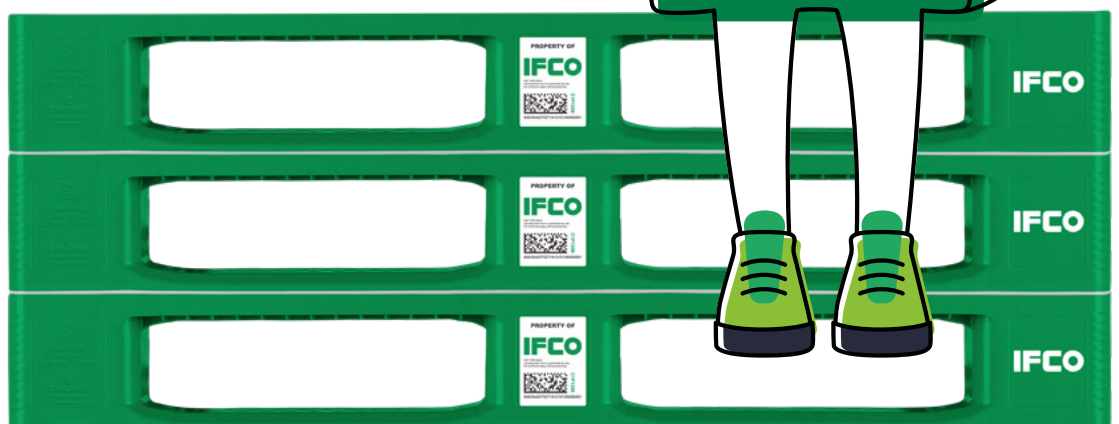

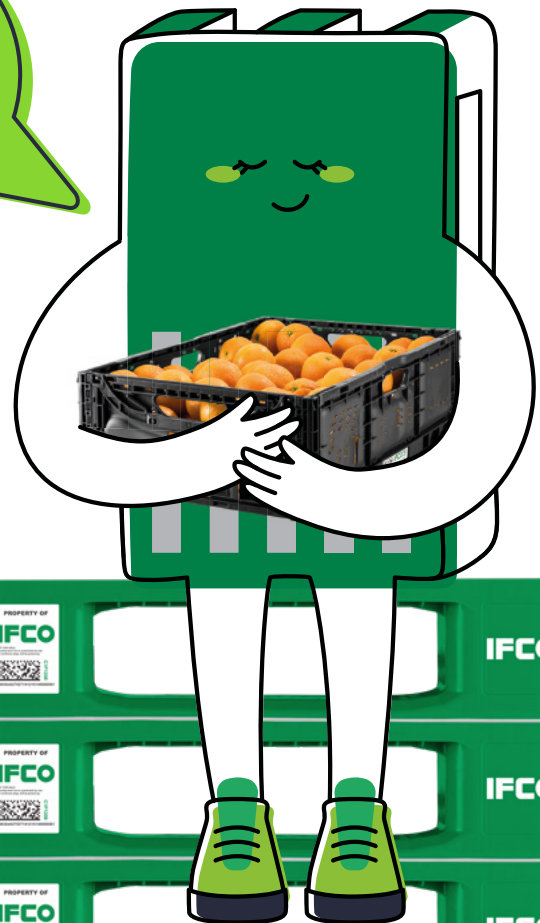

Reduced breakages

Assured availability

Join us in embracing a future where sustainability meets efficiency. IFCO - your gateway to a greener, more cost-effective supply chain.

Unlock efficiencies with Dora's digital excellence

Make the smart switch thanks to Dora's digital excellence. Leverage the power of digitally enabled pallets, as Dora boasts GRAI, BLE, GPS, and APs functionalities. Managed through the online portal MyIFCO, Dora introduces a new era of efficient pallet management.

Automated declarations

Streamline administration by eliminating the need for manual declarations of plastic pallet movements

Stock management

Enhance stock management through proactive monitoring of plastic pallet inventories, distributing them as needed via Vendor Managed Inventory

Supply chain transparency

Monitor your produce during transport, flagging suspicious activities and temperature fluctuations. Act swiftly to mitigate and minimize losses
